

Texas A&M Seminar - Energy Risk Management - March 24, 2006

This one-day Texas A&M workshop will help private, government and nonprofit organizations develop energy risk management strategies to reduce current energy costs and to protect against future energy price volatility. General topic areas include:

- Texas competitive electricity market and electricity pricing products
- Recent natural gas price increases and what to expect in the future
- Options for reducing current energy costs and risks associated with future prices
- Developing energy risk management strategies

Mr. Nottingham will be presenting Buying Strategies at 10:45 am.
Cirro Energy Services will have a booth in the Exhibition area.

For more information or to register for the event, see: <http://archone.tamu.edu/conted>

CUTTING ENERGY BILLS IN TEXAS:

How to Develop an Energy Risk Management Strategy / **March 24, 2006**
